Multidisciplinary professional with a solid background in Business Administration, Web Development and extensive experience in technology and project management.

WORK EXPERIENCE

Full Stack Developer | Freelance.
Feb. 2023 - Present.

Dedicated to addressing all aspects of web project development and management, from design and user experience to server implementation and database management. Throughout my career, I have demonstrated skills in various technologies and tools, including:

- Created RESTful API on the backend using Node.js and Express.js.
- Development of web applications with Angular 16, implementing masks in forms using the NGX-MASK library and using Bootstrap for data visualization modalities.
- Use of data table resources with the IGNITE UI library.
- Experience building blogs using a full technology stack, including Node.js, Express.js, React.js, Redux, MongoDB, and TailwindCSS and ES6+.
- Participation in projects that involve the architecture of microservices and deployments in AWS and Docker environments.

My focus is on delivering robust and scalable web solutions, with agile methodologies to guarantee excellence in each project.

Administrative Manager | Óptica Novak.
Jan. 2022 - May. 2023

I excel in team management, inventory control, cash closing, project management,
problem solving and meeting customer needs, effective relationships and payments on time
suppliers, market analysis, purchases and audits. Contributing to the success and growth of the business.

Front-End Developer | OFYS S.A.S.
Nov. 2020 - Jan. 2022

Financial company, collaborating in the management and development of a web application, applying technologies such as HTML5, JavaScript, CSS, Bootstrap, JQuery, MySQL, Responsive Design, authentication and authorization with OAuth, implementation of Unit and Integration Tests, in addition to ensuring connectivity with a Back-End in Java and version management with Git.
